laser printing coated paper

PERFORMANCE AND RELAX

## Quality and versatility, with a digital heart

The new **Burgo Digi** range was created to extend all the values of our coated papers to digital laser printing.

It is not just a collection of products but a range of solutions that embody Burgo's experience and attention to quality, and transform it into a new generation of top quality paper.

When speed and printing versatility are important, the unique qualities of the Digi line can make the difference: from fine printing projects to large print runs, the new Burgo coated papers are the most flexible tool to guarantee the best performance.

To all this we must add the importance of FSC® certification, which guarantees real respect for the environment. Each print stock offers class-topping printing quality, with chromatic fidelity that is always intense and precise, and perfect runnability at all working speeds.

### experia digi

This is a coated paper designed to convey every chromatic nuance perfectly.

The degree of humidity and its fibre and gloss content were designed specially to make it utterly reliable, a guarantee of outstanding results at all times.

## The challenge of quality

The idea of “quality” embraces a whole world of concrete values and elements. Demanding quality means giving a close look at what we do and how we do it. Which is why we strive constantly to ensure that our corporate management, which has received ISO 9001 certification, is always efficient and functional. And why our environmental policies, which are certified to ISO 14001, respect the precise rules that we have set ourselves and produce concrete results. Naturally, all this must be reflected in the most obvious fruit of our labours: our products. Even for the paper in the Digi range, in which the technical aspect is so important, our environmental commitment is always the same: it has produced **Experia Digi**, with FSC® Mixed Source certification.

Quality is a difficult and demanding challenge, but we are convinced that the development of our sector depends on such choices.

The mark of  
responsible forestry

100% recyclable

## Guarantees

**Experia Digi** is HP Indigo certified and is optimized for all the major laser printers.

Certified for  
**HP Indigo**

## experia digi

- Finishings: Gloss - Silk
- Gloss finishing: 95% ISO brightness
- Silk finishing: 97% ISO brightness
- FSC® certified
- Standard pack sizes are 32x45, 32x46 and 33x48 cm.
- Bulk paper is available on demand
- 270 and 400 gsm are available on demand
- Reels and other sheet-fed formats are available on demand.
